Vrent

Rental's earth

vrent

drive your choiche

VRENT is an Italian established business reality providing, since ten years, the best renting services to Companies operating in the **waste collection and ecology sectors**.

National Leader within the **short, medium and long term**, Vrent is also a prominent player in the re-marketing of nearly new vehicles coming from different fleets managed by the Group.

All this have been made possible thanks to the constant products' update, to the most advanced technical and technological innovations, all chosen among an **elite group of worldwide providers**.

VRENT is Your ideal partner to solve any problem in planning or in the execution of your projects.

Our fleet:

Made up of more than 1000 vehicles consists in 25 different types. This enables us to meet all needs in the Urban Sanitation sector.

Over the years, Vrent has improved his offer through developing two new different types of services. Through the **ZIPRENT** brand it offers a long term rental service dedicated to commercial vehicles and long distance industrial vehicles. **VFM TECHNIK** is the company managing all maintenance and assistance services of VRENT's fleet.

COMMERCIAL VEHICLES RENTAL LAST MILE

Ziprent is the winning formula proposed by Vrent Group for fleet's renting to shipping companies operating in the delivery area. Through customized applications we are able to plan vehicles availability and manage delivery peaks.

Our express courier customers have certified that our efficiency in managing the rented fleet contributed in relevant form to achieve an average monthly delivery target of 97%.

INDUSTRIAL VEHICLES RENTAL LONG DISTANCE

Ziprent's formula has been extended also to the fleet's rental dedicated to companies operating in the logistic sector. This formula enhances managing costs of customer's vehicle fleet and allows to keep customers' investment capacity.

Moreover, the formula is designed to protect companies from being affected by this particular historical stage of great regulations and technological changes, due to which, vehicles can be subject to fast obsolescence.

Offers the know how and technology to manage maintenance services for special and commercial vehicles all over Italian territory.
